Bundesblock

- Blockchain Bundesverband e.V. ("Bundesblock") was founded in 2017 as a non-profit association for the promotion of Blockchain Technology and is registered in the Lobbying Register of German Bundestag
- Largest Industry Association for Blockchain and Distributed Ledger Technology in the DACH-area (German speaking countries) with >90 member companies and research facilities
- Represents the collective voice of the Blockchain-Community, **aiming to officially establish Blockchain as a key technology**
- Provides working groups with industry experts regarding regulatory questions as well as regular exchange with policy makers
- Ensures there is close contact with regional interest groups and regional blockchain associations

BUNDESVERBAND

The Working Groups

One key element of Bundesblock are its working groups. This is where the different aspects and application areas of Blockchain and DLT technology are addressed in detail and where policy recommendations are drafted so they can be published.

- DAO
- Digital Euro
- Healthcare
- Digital Identities (SSI)
- Finance
- Legal
- Metaverse & NFTs
- Tax
- Supply Chain
- Technology & Science

What people say who co-lead a working group

Decentralized Autonomous Organization are an alternative hierarchy-free form of organization suitable for a future decentralized economy. Europe and Germany must recognize that the developments can no longer be stopped and that a suitable regulatory framework open to innovation must be established. This is what we are working for in the DAO working group.

Dr. Robert Müller, Co-lead DAO working group

The working group "Finance" deals with current legal, technical and financial developments related to blockchain technology, DLTs, DAGs and DAOs and their impact on the financial industry. I participate in the working group primarily because it gives me the opportunity to contribute both my professional experience in the financial industry and my interest in new technologies.

Zsófia Vig, Co-lead finance working group

Our interdisciplinary NFT & Metaverse working group identifies emerging use cases and develops innovative classification and systematization approaches. Interested in joining us? Contact us! We look forward to shaping the future together and promoting the spread of blockchain technology in Germany.

Florian Zeiser, Co-lead NFT & Metaverse working group

**BLOCKCHAIN
BUNDESVERBAND**

What are the membership requirements?

- The applicant's activity is related to blockchain, DLT and/or web3.
- The applicant is willing and able to make a positive contribution to the achievement of the Association's purpose.

**BLOCKCHAIN
BUNDESVERBAND**

Membership Fees

According to annual sales revenues and number of employees (FTE) there are five membership categories which determine the actual member fee. We also distinguish between:

- **Ordinary members** (core activity in the blockchain sector)
- **Sponsoring members**
- **Academic/non-profit members** (free membership)

Type of membership	Category 1	Category 2	Category 3	Category 4	Category 5
Employees	1-10 FTE	11-50 FTE	51-100 FTE	101-250 FTE	> 250 FTE
Sales revenue per year	< 500.000 EUR	< 1,5 Mio. EUR	> 5 Mio. EUR	> 10 Mio. EUR	> 10 Mio. EUR
Annual Membership Fee	EUR 500,--	EUR 1.700,--	EUR 4.000,--	EUR 7.500,--	individually

Membership Benefits

Visibility

- Find your company logo on the Bundesblock website
- Get access to our Slack-members-channel and internal newsletter
- Get introduced to the community in our newsletter and on social media
- Take part in the working groups and find your name on Bundesblock publications

Participation

- As an ordinary member: Have voting rights in the association and participate in shaping its future
- Get access to our newsletter and stay informed about our activities and any news regarding blockchain regulation
- Get free access to our working groups
- Meet other members and discuss your favourite topics

Events

- Participate in regular Bundesblock-member only lectures and events on current topics
- Get access to tickets for blockchain events (subject to availability)
- Be invited as a speaker for meetings/conferences
- Join the regular meetups at changing locations

Our Vision

“Germany successfully applies digital, decentralized and cryptographically encrypted services. These blockchain and distributed ledger technologies form a fundamental part of the digital infrastructure. Due to excellent entrepreneurial, educational and regulatory framework conditions, Germany is a global hub for expertise and practical know-how when it comes to these technologies.”

This is what we stand for!
